

Procedure

Social media for school and departmental promotion

Audience

Department-wide

Implementation Date: 19/03/2020
Version: 4.1

Purpose

To ensure that all online communications made on behalf of the Department of Education (DoE) using social media are consistent and appropriate as well as compliant with applicable laws concerning privacy, copyright and consent.

Overview

Social media provides opportunities to build communities and to encourage dialogue through the exploration and consideration of diverse thoughts and views. With the rapid growth and application of social media, DoE recognises the need to have procedures and guidelines, which ensure that those who use social media as part of their job, have guidance on DoE's expectations where social media is used.

This procedure provides guidance that DoE, including schools, must take into consideration when establishing or maintaining social media accounts.

The social media platforms currently approved for schools and for the department to use are Facebook, Twitter, YouTube, LinkedIn and Instagram. Schools are permitted one whole-of-school account per approved platform. It is important to have an understanding of how each of these social media platforms work, your target audience and how it fits into your overall engagement strategy before establishing a social media account.
